**First: Program Information:**

**University:** University of Al-Ameed

**College:** Nursing

**Department:** Nursing

**Name of Academic Program:** Bachelor of Nursing - Undergraduate Study

**Name of Final Degree:** Bachelor of Science in Nursing

**Study System:** Semesters

**File checked by the Quality Assurance and University Performance Division**

Name of the Director of the Quality Assurance and University Performance Division:

**Lecturer Assist. Abbas Fadhel Musa**

Vice President for Scientific Affairs

### 1. Program Vision

An effective academic program scientifically, professionally and ethically in the field of nursing.

### 2. Program Mission

Providing students with the knowledge, skills and competencies necessary to develop the nursing profession, improve community service and meet their needs for health care.

### 3. End of Program Objectives and Expected Learning Outcomes

#### Cognitive Aspect:

##### Goal

Providing the student with scientific knowledge to provide nursing care and contribute to the development of the nursing profession.

##### Learning Outcomes

1. Demonstrate the highest level of understanding and awareness of the scientific, professional and administrative aspects (nursing competencies) related to the practice of the nursing profession.
2. Appreciate the importance of learning and self-development and its impact on both the health care system and the health care recipient.
3. Commitment to policies related to reducing the rate of occupational risks when providing nursing care.

#### Practical Aspect:

##### Goal

Enabling the student to master the practical and applied skills related to the nursing profession based on evidence-based practice.

##### Learning Outcomes

1. Apply comprehensive nursing care related to the physiological, psychological and social needs of healthcare recipients.
2. Identify actual and potential needs associated with various health disorders and develop nursing plans based on scientific protocols.
3. Employ observation and critical thinking skills when evaluating health variables resulting from various health disorders and following up on their developments.
4. Understand the concepts of responsibility and accountability when applying nursing profession standards and adhering to the legal aspects regulating the profession.

#### Value aspect

##### Goal

Enhance the student's ability to demonstrate the highest level of

##### Learning Outcomes

1. Commitment to standards of professional, ethical and legal conduct when practicing the nursing profession.

|  |   |
|--|---|
| communication and effective participation. | 2. Participation of health team members and local community institutions in drawing up comprehensive action plans for health care recipients. |
|  | 3. Communicate effectively with health team members using communication skills and information technology                                     |

#### **4. Teaching and Learning Strategies**

1. Explanation and clarification through lectures using methods of displaying scientific materials with display devices: data show, smart boards, plasma screens
2. Self-learning through homework and mini-projects within lectures.
3. Clinical and laboratory training
4. Scientific visits.
5. Seminars and discussion groups.
6. Summer training

#### **5. Evaluation Methods**

1. Short Exams (Quiz)
2. Homework
3. Midterm and Final Exams for Theoretical and Practical Subjects
4. Small Projects within the Lesson
5. Interaction within the Lecture
6. Reports
7. Practical Evaluation
