## University of Al-Ameed - College of Nursing Academic Program Description

**Bachelor of Science in Nursing / Undergraduate  
2024 - 2025**

University of Al-Ameed – College of Nursing © 2024  
Karbala City Karbala – Najaf Highway Front of Pole (1238) P.O No:198 Karbala  
<https://alameed.edu.iq/College-of-Nursing>  
Mobile (07819165645), E-mail ([info@alameed.edu.iq](mailto:info@alameed.edu.iq))

**First: Program Information:**

**University:** University of Al-Ameed

**College:** Nursing

**Department:** Nursing

**Name of Academic Program:** Bachelor of Nursing - Undergraduate Study

**Name of Final Degree:** Bachelor of Science in Nursing

**Study System:** Semesters

**Date of Preparation of Description:** 8/ 9/ 2024

**Date of Filling the File:** 18/ 9/ 2024

Signature:

Name of the head of Department:

Prof. Dr. Diaa Kareem Abd Ali

Date: 18/9/2024

Signature:

Name of the Dean Assistance for Scientific Affairs:

Lecturer. Dr. Shahznan Hassan Bader

Date: 18/9/2024

**File checked by the Quality Assurance and University Performance Division**

Name of the Director of the Quality Assurance and University Performance Division:

Name: Lecturer Assist. Abbas Fadhel Musa

Date: 18/9/2024

Signature:

Approval of the College Dean

Assist. Prof. Dr. Diaa Kareem Abd Ali

## **1. Program Vision**

Effective professional academic nursing outcomes

## **2. Program Mission**

Building knowledge, research, and training partnerships, and enhancing the role of scientific research to produce professionally qualified nurses that serve the specialized labor market.

## **3. Program Objectives**

- 1 - Sustainability of educational programs
- 2- Enabling comprehensive student support
- 3- Encouraging scientific research
- 4 - Strengthening companies with counterparts
- 5 - Consolidating work with quality standards and comprehensive improvement

## **4. Program Accreditation**

The program has obtained **full programmatic accreditation** from the National Council for the Accreditation of Colleges of Nursing (NCANC).

## **5. External influences**

The program is influenced by a number of factors, including:

1. The rapid development of nursing services and the needs of society.
2. The instructions and regulations of several bodies sponsoring or supervising the implementation of academic programs, namely:
  - The Ministry of Higher Education and Scientific Research.
  - The Al-Abbas's (p) Holy Shrine.
  - The National Council for the Accreditation of Nursing Colleges.
  - The Committee of Deans of Iraqi Nursing Colleges.
  - Al-Ameed University.

## **6. Program's Structure**

Requirements	No. of Courses	Credits	%	Notes
Institution Requirements	10	16	11.4	
College Requirements	33	124	88.6	Requirements are combined as the College of Nursing is a single-department college
Department Requirements				
Summer Training	2	Pass/fail		Second stage (Adult Nursing) 120 hours, Third stage (Pediatric Nursing - Maternal and Neonatal Nursing) 120 hours

## 7. Program's Description:

Stage	Course Code	Course title	Credits hours		
			Theory	Clinical	Lab.
First 2024-2025	NUR101	Fundamentals of Nursing 1	4	0	6
	CHM102	Biochemistry	3	0	2
	ENG103	English 1	2	0	0
	ANT104	Anatomy	3	0	2
	ETH105	Code of Ethics	2	0	0
	COS106	Computer 1	1	0	0
	HUMR107	Democracy and Human Rights	2	0	0
	NUR108	Fundamentals of Nursing 2	4	12	0
	PHY109	Physiology	3	0	2
	ENG110	English II	2	0	0
	TER111	Medical Terminology	2	0	0
	COS112	Computer 2	0	0	2
	ARB113	Arabic	2	0	0
Second 2024-2025	NUR201	Adult Nursing 1	4	12	0
	PHR202	Pharmacology 1	2	0	0
	HAS203	Health Assessment	2	0	2
	MBN204	Microbiology 1	2	0	2
	C0S205	Computer 3	0	0	2
	CDB206	Baath Party Crimes	2	0	0
	NUR207	Adult Nursing 2	4	12	0
	PAT208	Pathophysiology for Nurses	2	0	0
	MBN209	Microbiology 2	2	0	2
	PHR210	Pharmacology 2	2	0	0
	C0S211	Computer 4	0	0	2
	ARB212	Arabic Language	2	0	0
	NUR213	Summer Clinical Training	0	30	0
Third 2024-2025	NUR301	Maternal and Neonatal Nursing	3	12	2
	RSM302	Research Methods	2	0	0
	HOS303	Health Sociology	2	0	0
	NUT304	Nutrition and Diet Therapy	2	0	0
	NUT305	Pediatric Nursing	3	12	2
	BST306	Biostatistics	2	0	0
	PHR307	Human Growth and Development	3	6	0
	NUR308	Summer Clinical Training	0	30	0
Fourth 2024-2025	NUR401	Community Health Nursing	3	12	0
	NUR402	Management and Leadership in Nursing	2	3	0
	NUR403	Issues in Nursing	2	0	0
	NUR404	Research Project 1	0	3	0
	HPR405	Health Promotion	2	0	0
	EPD406	Epidemiology	2	0	0
	NUR407	Psychology	3	12	0
	NUR408	Critical Care	2	12	0
	HPN409	Psychiatric and Mental Health Nursing	2	0	0
	NUR410	Research Project 2	0	3	0

## 8. Expected Learning Outcomes

### Cognitive Aspect:

Goal	Learning Outcomes and Indicators of Achievement
Providing the student with scientific knowledge to provide nursing care and contribute to the development of the nursing profession.	<ol style="list-style-type: none"> <li>1. Demonstrate the highest level of understanding and awareness of the scientific, professional and administrative aspects (nursing competencies) related to the practice of the nursing profession.</li> <li>2. Appreciate the importance of learning and self-development and its impact on both the health care system and the health care recipient.</li> <li>3. Commitment to policies related to reducing the rate of occupational risks when providing nursing care.</li> </ol>

### Practical Aspect:

Goal	Learning Outcomes and Indicators of Achievement
Enabling the student to master the practical and applied skills related to the nursing profession based on evidence-based practice.	<ol style="list-style-type: none"> <li>1. Apply comprehensive nursing care related to the physiological, psychological and social needs of healthcare recipients.</li> <li>2. Identify actual and potential needs associated with various health disorders and develop nursing plans based on scientific protocols.</li> <li>3. Employ observation and critical thinking skills when evaluating health variables resulting from various health disorders and following up on their developments.</li> <li>4. Understand the concepts of responsibility and accountability when applying nursing profession standards and adhering to the legal aspects regulating the profession.</li> </ol>

### Attitudes Aspect

Goal	Learning Outcomes and Indicators of Achievement
Enhance the student's ability to demonstrate the highest level of communication and effective participation.	<ol style="list-style-type: none"> <li>1. Commitment to standards of professional, ethical and legal conduct when practicing the nursing profession.</li> <li>2. Participation of health team members and local community institutions in drawing up comprehensive action plans for health care recipients.</li> <li>3. Communicate effectively with health team members using communication skills and information technology</li> </ol>

## **9. Teaching and Learning Strategies**

The program is based on the in-person education strategy and adopts the following teaching and learning methods and approaches:

1. Explanation and clarification through lectures using methods of displaying scientific materials with display devices: data show, smart boards, plasma screens
2. Self-learning through homework and mini-projects within lectures.
3. Clinical and laboratory training
4. Scientific visits.
5. Seminars and discussion groups.
6. Summer training

## **10. Evaluation Methods**

1. Short Exams (Quiz)
2. Homework
3. Midterm and Final Exams for Theoretical and Practical Subjects
4. Small Projects within the Lesson
5. Interaction within the Lecture
6. Reports
7. Practical Evaluation

## **11. Faculty Staff**

Scientific Title	Specialty		Requirements and Competencies	Number	
	Nursing	Others		Full time	Part time
Professor	4	0	Post-graduate degree and methods of Learning Certificate	4	0
Assist. Prof.	3	2		4	1
Instructor	3	2		2	3
Instructor Assistance	11	3		2	12

## **12. Professional Development**

### **Orientation of New Faculty Members**

The college orients new faculty members and supervises their effective implementation of their assigned roles through:

1. After confirming their academic credentials and title, ensuring their participation in teaching methods courses, Arabic language proficiency, and computer skills.
2. Holding meetings with them to educate them about the college's policies and objectives.
3. Involving them in delivering several lectures to faculty members.
4. Assigning them their assigned duties.
5. Involving them in attending faculty capacity development program activities. They also serve as lecturers in the Student Capacity Development Program, the Community Service Program, and the Sustainable Development Program.
6. Periodically evaluating their performance and informing them of any non-conformities so they can address them.

### **Professional development of faculty members**

1. A program for developing faculty capabilities and competencies is prepared annually. Student feedback is obtained on teaching and learning methods, and the results are discussed after statistical analysis.
2. Faculty members are also subject to field supervision to ensure they are performing their assigned duties effectively. They are also subject to an annual performance evaluation, after which they are provided with points of non-conformity for remediation.

### **13. Admission Criteria**

The college adopts both direct and indirect admission methods in this program. Students apply for admission to the program directly through the electronic system for admission to private colleges, under the supervision of the Ministry of Higher Education and Scientific Research. The Ministry directly oversees the application procedures, supervises student admissions, and ensures that colleges adhere to the Ministry's instructions regarding student admissions. No student may be admitted unless the Ministry has activated their account on the electronic system.

#### **General Student Admissions Regulations:**

1. Adoption of the electronic application form for admission to private universities and colleges.
2. Adoption of the principle of comparison based on average for admission to morning and evening studies.
3. Students are allowed to select only four options on the electronic application form.
4. Students must provide a report proving their physical and psychological well-being.
5. Students are accepted based on the options specified in the application form. Submitting the electronic application form for admission to private universities and colleges is not binding on the Ministry, but rather depends on their competitiveness and comparison with the student pool.
6. 8% of the foreign language grades added to any year of graduation are calculated and added to the student's total score, not their GPA (as in the example).

Student's total score: 560

French language score: 90

8% of the French score:  $90 * 0.08 = 7.2$

The student's total score after adding French becomes 567.2

7. One point is added to the GPA of the student applying who passed the first round of the preparatory school branches (scientific/ literary/ industrial/ commercial/ agricultural/ Islamic/ computer and information technology branch/ applied arts/ teachers' institute/ nursing/ midwifery). Students enrolled in the attempt system are denied this privilege.
8. Two points are added to the GPA of the student for preparatory studies in all its branches for those who have obtained a technical diploma/technical university certificate for admission to the corresponding specialty (the institute's certificate). The student must provide a certificate of graduation from the institute, as competition is based on the GPA and preparatory school certificate.
9. Institute graduates (diploma holders) who make up the top 20% of the total are eligible to apply to private universities and colleges with a major similar to their studies at the institute, provided that they are not granted the advantage described in paragraph (d)

above. Competition is based on the institute's GPA. The 20% is calculated for each major separately, with the fractional number rounded up to benefit the student (for example, in a major with (43) first-round graduates, 9 students are nominated).

10. The principle of competitive classes is applied in the event of competition for the last seats in the approved admission plan.
11. If a student is accepted for more than one seat (morning, evening), their acceptance will be based on the seat they register for, and their name will be removed from the other seat.
12. The student must contact the institution where their acceptance appears for the purpose of registration within a period not exceeding (10) working days; otherwise, their acceptance will be cancelled.

#### **14. The most important sources of information about the program**

1. The official website of the college (College of Nursing (<https://alameed.edu.iq/>)
2. The College of Nursing Guide.

#### **15. Program's Up to dating Plan**

The program is subject to periodic development by:

1. The curriculum development committees emanating from the Committee of Deans of Iraqi Nursing Colleges.
2. Faculty Members and Scientific Committee in the College of Nursing.
3. Planning and Programs Committee in the University of Al-Ameed with a representative of the College of Nursing.
4. Consultant and Manufacturing Council in the College of Nursing with a representative from the stakeholders, communities of interest, and students.

The process of up to dating is continuous, but it focused at the end of each academic year. After application of the program, the up to dating process id begin through many steps, are:

- Feedback from students and faculty members are collected.
- The feedback is analyzed.
- The new program is prepared.
- The stockholders and community of interest are involved in the preparing process.
- The final copy of the program is approved and published.

## 16. Curriculum Skills Plan

## **Second: Course Description**

<b>1. Course Name</b>	Fundamentals of Nursing I					
<b>2. Course Code</b>	NUR101					
<b>3. Semester/Year</b>	First Stage/First Semester					
<b>4. Date of Preparation of this Description</b>	18/ 9/ 2024					
<b>5. Available Attendance Forms</b>	Personal Education (In-Person)					
<b>6. Total Number of Hours and Units</b>	4 Theoretical + 6 lab (10 Hours Per Week), Number of Credits (7)					
<b>7. Name of Course Supervisor</b>	<table><tr><td>Name</td><td>E-Mail</td></tr><tr><td>Lecturer assist: Ali Falah Hassen</td><td>Ali falah@alameed.edu.iq</td></tr></table>		Name	E-Mail	Lecturer assist: Ali Falah Hassen	Ali falah@alameed.edu.iq
Name	E-Mail					
Lecturer assist: Ali Falah Hassen	Ali falah@alameed.edu.iq					
<b>8. Course Objectives</b>	<ol style="list-style-type: none"><li>1- Discuss concepts related to functional health patterns and their utilization in providing nursing care for client.</li><li>2- Realize the nursing process as a frame work for providing nursing care for a client with selected alterations I function health patterns.</li><li>3- Recognize the principle underlying all nursing intervention procedures related to providing</li><li>4- care to the client in adult nursing care.</li><li>5- Recognize the principles of infection prevention in clinical area.</li><li>6- Develop an awareness concerning the importance of health promotion for adult nursing care.</li><li>7- Apply a systematic approach of analyzing the patient's problems.</li><li>8- Utilize systematic approach in assessing the client health status.</li><li>9- Perform basic nursing skills related to various client conditions.</li><li>10- Provide a safe &amp; therapeutic environment for client care.</li><li>11- 10. Utilize principles of medical / surgical asepsis &amp; universal precautions in client care.</li></ol>					
<b>9. Teaching and learning strategies</b>	<ul style="list-style-type: none"><li>- Theoretical lectures.</li><li>- Discussions.</li><li>- Seminars, reports and scenarios.</li><li>- Clinical training.</li></ul>					

10. Course Structure					
Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Quizzes, students' participation in the lecture.	- Lectures.	History of nursing.	Learn about the history of the nursing profession, how this profession developed over a period of time, and who are the most famous pioneers and theorists in the field of nursing.	4T 1	
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars. - lab training.	Admission, transfer, referral, discharge of patient.	Knowing how to receive the patient and carry out nursing intervention by placing him or her in hospital, transporting, referring, and leaving after full recovery.	4T + 6 lab 2	
Quizzes, students' participation in the lecture, &Practical evaluation.	- Lectures. - Scenarios and seminars. - lab training.	Vital signs	Identify vital signs and how to measure them to determine the correct nursing intervention if they are high or low.	4T + 12 lab 3+4	
Quizzes, students' participation in the lecture, &Practical evaluation.	- Lectures. - Scenarios and seminars. - lab training.	Medication administration	Learn about methods of administering treatment, how to calculate drug doses, and respect the five rights of the patient.	4T + 12 lab 5+6	
Quizzes, students' participation in the lecture, &Practical evaluation.	- Lectures. - Scenarios and seminars. - lab training.	Asepsis	Learn about sterilization methods and how to wear and remove protective equipment.	4T + 6 lab 7	
Mid-term exam. No 1					8

Quizzes, students' participation in the lecture, & Practical evaluation.	<ul style="list-style-type: none"> <li>- Lectures.</li> <li>- Scenarios and seminars.</li> <li>- lab training.</li> </ul>	Hygiene	Learn how to provide personal physical care to the patient and improve the state of recovery by preserving the patient's body and safety.	4T + 6 lab	9
Quizzes, students' participation in the lecture, & Practical evaluation.	<ul style="list-style-type: none"> <li>- Lectures.</li> <li>- Scenarios and seminars.</li> <li>- lab training.</li> </ul>	Safety and activity	Learn how to turn a lying patient over and transfer him from a stretcher to a wheelchair and vice versa to prevent spinal injuries through correct posture and body mechanism.	4T + 6 lab	10
Quizzes, students' participation in the lecture, & Practical evaluation.	<ul style="list-style-type: none"> <li>- Lectures.</li> <li>- Scenarios and seminars.</li> <li>- lab training.</li> </ul>	Oxygenation.	Learn about the basic concepts of endocrine diseases and how to care for and educate patients.	4T + 6 lab	11
Quizzes, students' participation in the lecture, & Practical evaluation.	<ul style="list-style-type: none"> <li>- Lectures.</li> <li>- Scenarios and seminars.</li> <li>- lab training.</li> </ul>	Nutrition	Identify the patient's nutritional status, how to deal with the factors that affect the patient's nutrition, and develop a nutritional treatment plan for the patient.	4T + 6 lab	12
Quizzes, students' participation in the lecture, & Practical evaluation.	<ul style="list-style-type: none"> <li>- Lectures.</li> <li>- Scenarios and seminars.</li> <li>- lab training.</li> </ul>		Identifying the stages and cycle of sleep and what are the influencing factors, as well as identifying sleep diseases.	4T + 6 lab	13
Mid-term exam. № 2					14

		review	Review the most important theoretical and laboratory lectures	4T + 12 lab	15
<b>11. Course Evaluation</b>

8. Course Objectives	<p>After successfully completion of the course the students will be able to:</p> <ol style="list-style-type: none"> <li>1 Define nutrients, properties, and classification.</li> <li>2 Illustrate biochemical changes of nutrients and its metabolic pathway in human body.</li> <li>3 Realize some important body constituents and their chemical changes in the laboratory.</li> <li>4 Differentiate the biochemical functions of different human organs in normal and abnormal conditions.</li> <li>5 Understand the human biochemical reactions in normal situation and in case of diseases.</li> <li>6 Use laboratory methods for monitoring biochemical reactions in biological samples.</li> <li>7 Handle the laboratory equipment properly.</li> </ol>					
9. Teaching and learning strategies	<ul style="list-style-type: none"> <li>- Theoretical lectures.</li> <li>- Discussions.</li> <li>- Reports.</li> <li>- Lab training.</li> </ul>					

10. Course Structure					
Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Chemistry of Carbohydrate (Definition of carbohydrate, Classification, Chemical properties of Carbohydrate.	Learn the basic concepts of carbohydrate chemistry (definition and classification of carbohydrates and chemical properties of carbohydrates)	3T + 2 L	1
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Metabolism of Carbohydrate. -Glycolysis -Krebs Cycle -Glycogenesis -Glycogenolysis	Learn the basic concepts of carbohydrate metabolism, glycolysis, Krebs cycle, Glycogenesis, glycogenolysis	3T + 2 L	2
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Metabolic disorder of carbohydrate metabolism. -Diabetes mellitus.	learn the basic concepts of carbohydrate metabolism disorder (diabetes)	3T + 2 L	3
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Chemistry of lipids Definition Fats, oil, Waxes, Fatty acids, Classification, Some important chemical properties.	learn the basic concepts of fats and fatty acids, their classification and chemical properties.	3T + 2 L	4
		Mid-term exam. No 1			5
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Lipids metabolism ,Fats Oxidation	learn the basic concepts of fat metabolism and oxidation.	3T + 2 L	6
Quizzes, students' participation in the	- Lectures. - seminars. - Lab training.	Metabolic disorder of lipids metabolism, Ketosis.	Understand the basic concepts of metabolic	3T + 2 L	7

lecture, & Practical evaluation.			disorders in fat metabolism.	
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Chemistry of Amino acids and proteins Definitions of amino acid and protein. Classification of Amino acid. Classification of proteins. Some important properties of protein	Understand the basic concepts of amino acids and proteins, their classification and chemical properties	3T + 2 L      8
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Protein metabolism. Metabolic disorder of protein metabolism	Understand the basic concepts of protein metabolism and metabolic disorders.	3T + 2 L      9
<b>Mid-term exam. No 2</b>				10
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Blood protein. Non protein. Nitrogen products. -Urea Formation. -Creatinine Formation. -Uric Acid Formation.	Understand the basic concepts of blood protein and nitrogen products (urea, creatinine and uric acid formation)	3T + 2 L      11
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Definition of Enzymes, Substrate. Hole Enzyme, Coenzyme unit of Enzyme and Zymogene.	Understand learn the basic concepts of enzymes and coenzymes	3T + 2 L      12
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Inhibition of Enzyme. -Competitive inhibitors. -Non Competitive inhibitors. Factors influence the activity of Enzyme	Understand learn the basic concepts of enzyme inhibition, and factors affecting enzyme activity.	3T + 2 L      13
Quizzes, students' participation in the lecture, & Practical evaluation.	- Lectures. - seminars. - Lab training.	Liver Function test -Classification the liver Function test.	Understand the basic concepts of liver function tests, their classifications,	3T + 2 L      14

		-Uses of Various testes collecting to evaluate the liver dysfunction	and the assessment of liver dysfunction

Evaluation Methods	Teaching and Learning Methods	Subject Title	Hours	Week	
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - clinical training.	Nursing process	Identify the steps of nursing process and how to apply them to the patient to obtain the desired result.	4T + 12 c	1
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - clinical training.	Preoperative Nursing	Identifying the types of surgery, the role of the nurse during the perioperative period, and how to deal with complications for each surgical stage.	4T + 12 c	2
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - clinical training.	Pain Management	Identify the types of pain, how to evaluate and care for it, and what are the theories related to pain.	4T + 12 c	3
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - clinical training.	Fluid & Chemical Balance	Learn how acid and base are balanced and what happens when each rises, in addition to how to evaluate the volume of fluids entering and leaving the body.	8T +24c 4+5	
		Mid-term exam. № 2		4T + 12 c	6
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - clinical training.	Bowel Elimination	Identify how the defecation process occurs, assess the health status of the patient's intestines, and how to provide nursing care if he has an intestinal stoma.		7
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - clinical training.	Urinary Elimination	Identifying how the urination process occurs, identifying the normal and abnormal		8

		characteristics of urine, and how to provide nursing care to a patient who has a urinary catheter.	
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - clinical training.	Wound care  Identifying the types of wounds, types of thread, and how to deal with wounds, washing, and bandaging.	4T + 12 c  9
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - clinical training.	Death & Dying  Identifying the stages of death, how to deal with a patient after death, and how to remove medical tools from the patient.	4T + 12 c  10
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - clinical training.	Documentation  Identifying the foundations of nursing documentation for the patient at the beginning of his entry into the health institution and after his discharge.	4T + 12 c  11
		Mid-term exam. No 2  review	12  Review the most important theoretical and laboratory lectures

8. Course Objectives	<p>This course is designed to provide the nursing students with basic theoretical and laboratory knowledge about different human systems which provides information about the mutual interaction between cells, tissues, and organs of these systems in performing their functions and maintaining the internal environment in a stable condition.</p> <p>At the end of the course the student will be able to:</p> <ol style="list-style-type: none"> <li>1. Recognize the structures and functions of the body (cells, tissues, organs and systems).</li> <li>2. Know the mechanism of the normal body functions.</li> <li>3. Understand the relation between structures and functions of the different parts of the body.</li> <li>4. Practice different diagnostic tests.</li> </ol>					
9. Teaching and learning strategies	<ul style="list-style-type: none"> <li>- Theoretical lectures.</li> <li>- Discussions.</li> <li>- Reports.</li> <li>- Laboratory training.</li> </ul>					

## 10. Course Structure

Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Introduction of Human Body.	Learn about the definition of the physiology of different human cells, elementary tissues, organs, and systems of the body.	3T + 2 L	1
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Cell Structure and Function	Learn about Plasma membrane and cellular organelles. Functions of plasma membrane and cellular organelles.	3T + 2 L	2
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Fluids and Electrolytes	Learn about the essential elements of the body, fluid comparative and fluid composition. Understand the main disorders of fluid and electrolytes	3T + 2 L	3
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Blood	Learn about the Blood cells; morphology and functions. Regulation of blood cells production. Plasma; constitution and functions. Blood clotting and anticoagulation system. Functional disorder of blood.	3T + 2 L	4
Daily exams, Questions within the lecture, & Practical evaluation.		Mid-term exam. № 1	Understand the basic concepts of Structure of the heart, vascular and lymphatic systems. Cardiac cycle and heart sounds. Heart beats and electrocardiogram. Cardiovascular regulation mechanism. Functional disorders of heart and circulation.	5	
Daily exams, Questions within the lecture, & Practical evaluation.		Heart and Circulation	Cardiovascular regulation mechanism. Functional disorders of heart and circulation.	3T + 2 L	6

Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Digestive System	Understand the basic concepts of digestive system and the physiology of digestive system. Understand the integration of digestive system with other systems. Disorders of digestive system	$3T + 2L$ 7
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Respiratory System	Understand the Structure of respiratory system. Ventilation, gas exchange and transport. Lung volume and capacity. Control of respiration. Understand the Blood gases and acid-base balance. Integration of respiration system with other systems. Functional disorders of respiration system.	$3T + 2L$ 8
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Muscles and Nerves	Understand the structures and functions of muscles. Understand the structures and functions of central nervous system. Understand the Structures and function of peripheral nervous system and cerebrospinal fluid. Understand the synapse, neuromuscular junction and functional disorders.	$3T + 2L$ 9
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Mid-term exam. No 2	Learn about the somatic sensation, Vision, Hearing, Smell, Reflexes as component of	10 $3T + 2L$ 11

		control system, and Functional disorders.	
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Understand the Chemical messengers. Structure and functions of hypothalamus. Structure and functions of pituitary gland. Structure and functions of thyroid and parathyroid glands. Structure and functions of adrenal gland and thymus. Functional disorders.	12
		Endocrine Glands	
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Understand the General terminology and concepts. Physiology of male and female reproductive systems. Hormones which control of male and female reproductive systems. Pregnancy. Parturition and lactation. Functional disorders.	13
		Reproductive System	
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Understand the physiology of urinary system. Renal function. Renal circulation. Micturition. Renal function tests. Effect of disordered renal functions.	14
		Urinary System	
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Laboratory training.	Learn about the homeostasis & stress, general adaptation syndrome, and local adaptation syndrome. Learn the basic concepts of hormonal imbalance during stress.	15
		Physiology of Stress and Adaptation.

Course Objectives	<ol style="list-style-type: none"> <li>After successful completion of this course, students will develop a confidence in using English</li> <li>language through constructing different grammatically correct sentences both in oral and written</li> <li>modes. In addition, students will deliver oral presentations and receive feedback on their performance.</li> <li>Students will also improve their reading fluency skills, enhance their listening skills, enlarge their vocabulary, strengthen their writing ability and improve their pronunciation skills.</li> </ol>					
9. Teaching and learning strategies	<ul style="list-style-type: none"> <li>Theoretical lectures.</li> <li>Listening.</li> <li>Speaking.</li> </ul>					

#### 10. Course Structure

Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, conversation	Reading and listening	Hospital admission	Knowing the vocabulary for the initial assessment of patients condition	2 T	1
Daily exams, conversation	Practice using past simple and past continuous	Past simple and past continuous	Using the past for events that ended and continuous for events that are still ongoing	2 T	2
Daily exams, conversation	Proper pronunciation	First aid	Identifying first aid vocabulary	2 T	3
Daily exams, conversation	Using types of obligation in useful sentences	Talking about obligation	Grammar structures related to types of obligations	2 T	4
		Mid-term exam. No 1	Comprehension of a passage to extract new vocabulary	2 T	5
Daily exams, conversation	Reading and discussing the text, proper pronunciation	Pain	Listening to audio clips to learn new vocabulary and understand meaning from context	2 T	6
Daily exams, conversation	Listening	A patient record form	Derivation adjective from nouns	2 T	7
Daily exams, conversation	Deriving adjectives and nouns	Adjectives and nouns	Develop ability to compare things and persons	2 T	8
Daily exams, conversation	Use examples for comparison	Comparative adjectives	Mid-term exam. No 2	2 T	9
		10			

Daily exams, conversation	Explain and provide examples of four types with exercises	Conditional 'if'	Develop ability to use conditional sentences to	2 T	11																															
Daily exams, conversation	Reading and discussing the text, proper pronunciation	Nutrition and obesity	Comprehension of a passage to extract new vocabulary	2 T	12																															
Daily exams, conversation	Listening	Blood types	Listening to audio clips to learn new vocabulary and understand meaning from context	2 T	13																															
Daily exams, conversation	Using suggestion and offer	Suggestion and offer	Enable students to distinguish between suggestion and offer	2 T	14																															
Daily exams, conversation	Understand tenses in reported speech	Reported speech	Develop students' skills in accurately converting direct speech into reported speech	2 T	15

5. اشكال الحضور المتاحة	
التعليم الشخصي (حضورى)	
6. عدد الساعات والوحدات الدراسية الكلى	
2نظري , عدد الوحدات(2)	
7. اسم مسؤول المقرر	
الايميل	الاسم
<a href="mailto:jasmmhsn654@gmail.com">jasmmhsn654@gmail.com</a>	د. جاسم محسن السلطاني
8. اهداف المقرر	
1. أن ينشأ الطالب على حب العربية لغة القرآن الكريم.	
2. التعرّف على مواطن الجمال في اللغة العربية وأدابها.	
3. تعريف الطالب بألفاظ اللغة العربية الصحيحة وتراثها وأساليبها السليمة بطريقة مشوقة وجذابة.	
4. تمكّن الطالب من استعمال اللغة صحيحاً في الاتصال القراءة الصحيحة، وأن يكتسب القدرة على صياغة العبارات لغويًا.	
5. تنمية الذوق الأدبي لدى الطالب حتى يدرك النواحي الجمالية في أساليب الكلام ومعانيه وصوره.	
6. استعمال أفكاره وما يقع تحت حواسه نطقاً وكتاباً وحسن تعويذه للعبارات السليمة الواضحة.	
7. إيقاظ وعي الطالب إدراك حرف الكلمة وتوجيهها، للمحافظة على ظهارتها ونفائها.	
8. العمل على النهوض باللغة العربية والعمل على نشرها قدر المستطاع.	
9. تعليم الطالب قواعد الحديث واحترام الرأي الآخر وكذلك التغلب على عامل العجلة	
9. استراتيجيات التعليم والتعلم	
- المحاضرات النظرية.	
- المناقشات.	

10. بنية المقرر					
ال أسبوع	الساعات	اسم الوحدة أو الموضوع	طريقة التعلم	مخرجات الناطق المطلوبة	
الأسبوع 1	2	اللغة العربية، وأهميتها	- محاضرات نظرية.	1- يُعرف مفهوم اللغة العربية. 2- يبيّن أهمية اللغة العربية. 3- يوضح خصائص اللغة العربية. 4- بعد بعض علماء الطب العرب. 5- يشرح حياة علماء الطب العرب.	
الأسبوع 2	2	اللغة العربية، وأهميتها	- امتحانات يومية. - اسئلة داخل المحاضرة.	1- يُعرفوا أقسام الكلام. 2- يحدّدوا الأسماء. 3- يوضّحوا علامات الأسماء. 4- ينشّوا جمل فيها اسماء. 5- يحدّدوا الفعل ويفضّلوا عدّاته. 6- يعرّفوا الحرف. 7- يبيّنوا بين المبني والمعرب.	
الأسبوع 3	2	الإملاء واللغة	- محاضرات نظرية.	الإخطاء الشائعة في الإملاء واللغة	التعرف على الإخطاء الشائعة في الإملاء واللغة
الأسبوع 4	2	الإخطاء الشائعة في اللغة	- محاضرات نظرية.	الإخطاء الشائعة في اللغة	التعرف على الإخطاء الشائعة في اللغة
الأسبوع 5	2	التواسخ في العربية	Mid-term exam. No 1	التواسخ في العربية	التعرف على التواسخ في العربية
الأسبوع 6	2	المبني والمعرب	- امتحانات يومية. - اسئلة داخل المحاضرة.	محاضرات نظرية.	التعرف على المبني والمعرب
الأسبوع 7	2	الشعر الحر	- امتحانات يومية. - اسئلة داخل المحاضرة.	محاضرات نظرية.	التعرف على الأدب العربي، الحديث.
الأسبوع 8	2	الشعر الحر	- امتحانات يومية. - اسئلة داخل المحاضرة.	محاضرات نظرية.	1- يُعرف الأدب العربي. 2- يبيّن نوعي الأدب. 3- يذكر الشعر الحر. 4- يحفظ قصيدة من الشعر الحر.
الأسبوع 9	2	خطبة الرسول (صلى الله عليه وآله) بعد غزوة حنين	- محاضرات نظرية.	وأله الصلاة والسلام. من خلال خطبة الرسول (صلى الله عليه وآله) بعد غزوة حنين	

		Mid-term exam. No 2	10
- امتحانات يومية. - أسألة داخل المحاضرة.	محاضرات نظرية	تحديد متن ترثي العلامات الفرغية عن العلامة الأصلية. تمييز موضع العلامات الفرغية لكتابه أعرابية. تبين موضع العلامات الفرغية في حالة الرفق والتصب والجر والجرم.	2ن 11
- امتحانات يومية. - أسألة داخل المحاضرة.	محاضرات نظرية.	كيفية وضع علامات أو رموز منطق عليها توضع بين الكلمة وأخرى، أو جملة وأخرى، أو في بدايات الجمل ونهاياتها، ترشد القارئ إلى ما يريد كاتب النص.	2ن 12
- امتحانات يومية. - أسألة داخل المحاضرة.	محاضرات نظرية.	كتاب النصر، التعرف على الشعرا المخضريين الذين عاشوا قبل الإسلام وأنوروكا الإسلام وقصائدهم في الرثاء	2ن 13
- امتحانات يومية. - أسألة داخل المحاضرة.	محاضرات نظرية.	1- يعرف الشاعر. 2- بين مواقف الشاعر الحسينية. 3- يوضح حب الشاعر لأهل بيته النبوة عليهم السلام. 4- يقرأ قصيدة الشاعر. 5- يشرح معنى القصيدة.	2ن 14
- امتحانات يومية. - أسألة داخل المحاضرة.	محاضرات نظرية.	مبوبة الفرزدق	
- امتحانات يومية. - أسألة داخل المحاضرة.		أ- معرفة معاني القرآن، وأسرار التعبير فيه. ب- اختبار النصوص البلغة من الشعر والتشر. ج- تنبية القدرة على تمييز الكلام المحسن من الوديع. د- مساعدة المتكلم صياغة كلامه على وفق المناسبية.	2ن 15
		البلاغة في اللغة والاصطلاح محاضرات نظرية.

8. Course Objectives	<ol style="list-style-type: none"> <li>1- Identify risk factors and nursing interventions in promoting and maintaining health in selected patients.</li> <li>2- Relate the pathophysiology of selected medical/surgical interventions to the continuum of health and disease.</li> <li>3- Discuss the scientific basis for select diagnostic procedures, their outcomes, and nursing responsibilities.</li> <li>4- Describe drug therapies and their relevant outcomes for patients undergoing medical/surgical interventions.</li> <li>5- Explain the nutritional needs of patients undergoing selected medical/surgical interventions.</li> <li>6- Discuss the principles of teaching and learning processes in relation to the adult/older patient.</li> <li>7- Utilize health assessment skills in identifying the physical, psychological, spiritual, and educational needs of adult patients.</li> <li>8- Apply theoretical concepts and scientific principles in planning patient care.</li> <li>9- Demonstrate competence in implementing nursing interventions to achieve patient-oriented goals.</li> <li>10- Demonstrate safe administration of medications and parenteral therapy.</li> <li>11- Participate in patient education.</li> <li>12- Demonstrate effective communication with patients, educators, and health care professionals.</li> <li>13- Describe preoperative nursing measures to avoid the risk of infection and expected complications after surgery.</li> </ol>					
9. Teaching and learning strategies	<ul style="list-style-type: none"> <li>- Theoretical lectures.</li> <li>- Discussions.</li> <li>- Seminars, reports and scenarios.</li> <li>- Clinical training.</li> </ul>					

## 10. Course Structure

Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars. - Clinical training.	<b>Introduction to Adult Nursing. Nursing Process.</b>	Learn about the philosophy and objectives of adult nursing. Also learn about the basic concepts, steps and how to apply the nursing process with the participation of patients.	4T + 12 C	1
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars. - Clinical training.	<b>Rehabilitation in Nursing</b>	Learn about the basic concepts and the rehabilitation team and how to apply medical rehabilitation with the participation of patients.	4T + 12 C	2
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars. - Clinical training.	<b>Care of patients with cancer</b>	Learn about the basic concepts of cancer and how to care for and educate patients.	4T + 12 C	3
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	<b>The patient with breast cancer</b>	Learn about the basic concepts of breast cancer and how to care for and educate patients.	4T + 12 C	4
Daily exams, Questions within the lecture, & Practical evaluation.		<b>Mid-term exam. No 1</b>		5	
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	<b>Nursing management for patient with digestive system disease.</b>	Understand the basic concepts of gastro-intestinal diseases and how to care for and educate patients.	4T + 12 C	6
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	<b>The patient with hepatobiliary disorders</b>	Understand the basic concepts of liver and biliary diseases and how	4T + 12 C	7

			to care for and educate patients.	
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Nursing care for patients with endocrine system disorders.	Understand the basic concepts of endocrine diseases and how to care for and educate patients.	4T + 12 C 8
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Nursing management for patients with blood disorders.	Understand the basic concepts of blood diseases and how to care for and educate patients.	4T + 12 C 9
		Mid-term exam. No 2		10
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 1: Cardiovascular Disorders (Sign and symptoms, Diagnostic tests, Nursing care and rehabilitation for patient with CVD)	Understand the basic concepts of cardiovascular disease and how to care for and educate patients.	4T + 12 C 11
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 2: Cardiovascular Disorders (Hypertension, Ischemic heart disease, Myocardial infarction)	Understand the basic concepts of cardiovascular disease and how to care for and educate patients.	4T + 12 C 12
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 3: Cardiovascular Disorders (Congestive heart failure, Endocarditis)	Understand the basic concepts of cardiovascular disease and how to care for and educate patients.	4T + 12 C 13
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 1: Respiratory disorders (Sign and symptoms, Diagnostic tests, Nursing care and rehabilitation for patient with RD).	Understand the basic concepts of respiratory disease and how to care for and educate patients.	4T + 12 C 14
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars	Part 2: Respiratory disorders (Bronchitis, Pneumonia, COPD.)	Learn the basic concepts of respiratory diseases	4T + 12 C 15

- Clinical training.				and how to care for and educate patients.

<b>8. Course Objectives</b>	<ol style="list-style-type: none"> <li>1. Differentiate between various types of drug groups</li> <li>2. types of drugs, such as doses, side effects, and methods of administration.</li> <li>3. Recognize the responsibility of the nurse in giving drugs through the therapeutic process.</li> <li>4. Realize different types of drug therapy across the life span</li> <li>5. Identify the basic principles of pharmacology and its application in nursing practice</li> <li>6. Identify the essential principles in administration of medications.</li> <li>7. Recognize drugs acting on common diseases..</li> </ol>					
<b>9. Teaching and learning strategies</b>	<ul style="list-style-type: none"> <li>- Theoretical lectures.</li> <li>- Discussions.</li> <li>- Seminars, reports and scenarios.</li> </ul>					

#### 10. Course Structure

Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, Questions within the lecture	- Lectures. - Scenarios and seminars.	Introduction to pharmacology & terminology	Learn about the general terms in pharmacology and what is the different between them.	2T	1
Daily exams, Questions within the lecture.	- Lectures. - Scenarios and seminars.	Pharmacokinetics	Learn about the basic concepts of drug kinetic and how body deal with the drugs	2T	2
Daily exams, Questions within the lecture,	- Lectures. - Scenarios and seminars. - Clinical training	Pharmacodynamics	Learn about the basic concepts of drug kinetics and how drug affects the body	2T	3
Daily exams, Questions within the lecture,	- Lectures. - Scenarios and seminars	Autonomic nervous system (cholinergic)	Learn about the basic concepts of ANS and cholinergic drugs.	2T	4
Daily exams, Questions within the lecture,	- Lectures. - Scenarios and seminars	Autonomic nervous system (adrenergic)	Learn about the basic concepts of ANS and adrenergic drugs.	2T	5
Mid-term exam. No 1				6	
Daily exams, Questions within the lecture	- Lectures. - Scenarios and seminars. -	Cardiovascular drug part 1	Understand the basic concepts of CVS physiology and drugs affect this system.	2T	7
Daily exams, Questions within the lecture.	- Lectures. - Scenarios and seminars. -	Cardiovascular drug part 2	Understand the basic concepts of CVS physiology and drugs affect this system.	2T	8
Daily exams, Questions within the lecture,	- Lectures. - Scenarios and seminars.	Drug for anemia	Understand the basic concepts anemia and which is the best therapy	2T	9

Daily exams, Questions within the lecture,	- Lectures. - Scenarios and seminars.	Pediatric drugs	Understand the basic concepts of pediatrics and how to calculate the pediatric drug doses.	2T	10																																							
Daily exams, Questions within the lecture	- Lectures. - Scenarios and seminars.	Geriatric drugs	Understand the basic concepts of geriatrics and how to deal with them.	2T	12																																							
Daily exams, Questions within the lecture,,	- Lectures. - Scenarios and seminars.	introduction to Gynecology	Understand the basic concepts of gynecology disease and treatments.	2T	13																																							
Daily exams, Questions within the lecture,	- Lectures. - Scenarios and seminars.	Gynecology problems and treatments	Understand the basic concepts of gynecology disease and treatments.	2T	14

## 12. Learning Resources

- Jawetz Melnick & Adelbergs Medical Microbiology 26/E (Lange Medical Books) 26th Edition, 2023.
- Paniker's Textbook of Medical Parasitology 8th Edition, 2021
- Online learning Videos.
- Different Online Scientific Articles and Journals..

<b>1. Course Name</b>	Computer Science					
<b>2. Course Code</b>	COS205					
<b>3. Semester/Year</b>	Second Stage/First Semester					
<b>4. Date of Preparation of this Description</b>	18/ 9/ 2024					
<b>5. Available Attendance Forms</b>	Personal Education (In-Person)					
<b>6. Total Number of Hours and Units</b>	2 Lab, Number of Credits (1)					
<b>7. Name of Course Supervisor</b>	<table border="1"> <tr> <td>Name</td> <td>E-Mail</td> </tr> <tr> <td>Ahmed Dheyaa Radhi</td> <td>ahmosawi@alameed.edu.iq</td> </tr> </table>		Name	E-Mail	Ahmed Dheyaa Radhi	ahmosawi@alameed.edu.iq
Name	E-Mail					
Ahmed Dheyaa Radhi	ahmosawi@alameed.edu.iq					
<b>8. Course Objectives</b>	<ol style="list-style-type: none"> <li>1. Familiarize with the User Interface: Learn how to navigate the PowerPoint interface, including menus and the main ribbon.</li> <li>2. Create Presentations: Learn how to create professional presentations from scratch using blank slides or pre-designed templates.</li> <li>3. Slide Formatting: Gain the ability to format slides by adding text, titles, images, tables, and charts.</li> <li>4. Using Animations and Effects: Learn how to add animation effects and slide transitions to make the presentation more interactive.</li> <li>5. Insert Audio and Video: Learn how to embed audio and video files into the presentation</li> <li>6. Organizing Content: Learn how to effectively organize slides, including using bullet points and numbered lists to present information clearly.</li> <li>7. Handling the Presentation: Learn how to navigate through slides and control the presentation while delivering it.</li> <li>8. Using Notes and Speaker Tools: Learn how to add speaker notes below slides to assist the presenter during the presentation.</li> <li>9. Collaboration and Sharing: Learn how to share presentations with others for teamwork or online collaboration.</li> <li>10. Preparing the Presentation for Printing or Distribution: Learn how to prepare presentations for printing or distributing electronically.</li> </ol>					
<b>9. Teaching and learning strategies</b>	<ul style="list-style-type: none"> <li>- Discussions.</li> <li>- Lab Training</li> </ul>

<b>8. Course Objectives</b>	<ol style="list-style-type: none"> <li>- Knowing the concept of crime, its elements, forms and types of its commission, as well as methods of proving the crime.</li> <li>- Presenting and discussing the basis and nature of the criminal court for trying symbols of the former regime in 2005.</li> <li>- Description and analysis of the decisions issued by the Special Criminal Court to try symbols of the former regime.</li> <li>- Explaining the psychological crimes committed by the Baath regime in Iraq, the mechanisms of committing them, and their effects.</li> <li>- Presenting and discussing images of social crimes committed by the Baath regime in Iraq.</li> <li>- Statement of the position of the Baath regime in Iraq on religion.</li> <li>- Shedding light on the militarization of society during the time of the Baath regime in Iraq and the violations that affected Iraqi laws.</li> <li>- Introducing the crimes of power and human rights violations during the Baath era in Iraq.</li> <li>- Presenting and discussing the environmental crimes committed by the Baath regime in Iraq.</li> <li>- Highlighting the destruction of cities and villages and following the scorched earth policy by the Baath regime.</li> <li>- Introducing the crime of draining the marshes of Iraq by the Baath regime</li> <li>- Introducing the details of the crime of mass graves by the Baath regime in Iraq.</li> </ol>				
<b>9. Teaching and learning strategies</b>	<ul style="list-style-type: none"> <li>- Theoretical lectures.</li> <li>- Discussions.</li> </ul>				

10. Course Structure						
Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week	
Daily exams, Questions within the lecture,	- Lectures. - Discussions.	The concept of crime, its elements, forms of commission, types, and methods of proving the crime	Introducing students to the concept of crime, its elements, forms of commission and types, as well as methods of proving the crime	2T 1		
Daily exams, Questions within the lecture,	- Lectures. - Discussions.	The Special Criminal Court for the Trial of Leaders of the Former Regime in 2005	Learn about the concepts of the criminal court for trying symbols of the former regime in 2005	2T 2		
Daily exams, Questions within the lecture,	- Lectures. - Discussions.	The rulings issued by the Special Criminal Court for the Trial of Leaders of the Former Regime	Introducing students to the decisions issued by the Special Criminal Court to try symbols of the former regime	2T 3		
Daily exams, Questions within the lecture.	- Lectures. - Discussions.	The Psychological Crimes Committed by the Ba'ath Regime in Iraq, Their Mechanisms, and Their Effects	Introducing students to the psychological crimes committed by the Baath regime in Iraq, the mechanisms of committing them, and their effects	2T 4		
<b>Mid-term exam. No 1</b>						
Daily exams, Questions within the lecture,	- Lectures. - Discussions.	The Social Crimes Committed by the Ba'ath Regime in Iraq	Showing images of social crimes committed by the Baath regime in Iraq	2T 6		
Daily exams, Questions within the lecture,	- Lectures. - Discussions.	The Ba'ath Regime's Stance on Religion in Iraq	Introducing students to the position of the Baath regime in Iraq regarding religion	2T 7		

Daily exams, Questions within the lecture,	- Lectures. - Discussions.	The Militarization of Society During the Ba'ath Regime in Iraq and the Violations of Iraqi Laws	Introducing students to the concept of militarization of society during the time of the Baath regime in Iraq and the violations that affected Iraqi laws	2T	8
Daily exams, Questions within the lecture,	- Lectures. - Discussions.	Crimes of Authority and Human Rights Violations During the Ba'ath Regime in Iraq	Identify the concepts of power crimes and human rights violations during the Baath era in Iraq	2T	9
Mid-term exam. No 2				10	
Daily exams, Questions within the lecture,	- Lectures. - Discussions.	Environmental Crimes Committed by the Baath Regime in Iraq	Introducing students to environmental crimes committed by the Baath regime in Iraq	2T	11
Daily exams, Questions within the lecture,	- Lectures. - Discussions.	Destruction of Cities and Villages and the Policy of Scorched Earth by the Ba'ath Regime	Educating students about the concept of destroying cities and villages and following the scorched earth policy by the Baath regime	2T	12
Daily exams, Questions within the lecture.	- Lectures. - Discussions.	The Crime of Draining the Marshes of Iraq by the Ba'ath Regime	Introducing students to the crime of draining the marshes of Iraq by the Baath regime	2T	13
Daily exams, Questions within the lecture,	- Lectures. - Discussions.	The Crime of Mass Graves by the Ba'ath Regime in Iraq	Introducing students to the crime of mass graves by the Baath regime in Iraq	2T	14

<b>8. Course Objectives</b>	<ol style="list-style-type: none"> <li>1- Identify risk factors and nursing interventions in promoting and maintaining health in selected patients.</li> <li>2- Relate the pathophysiology of selected medical/surgical interventions to the continuum of health and disease.</li> <li>3- Discuss the scientific basis for select diagnostic procedures, their outcomes, and nursing responsibilities.</li> <li>4- Describe drug therapies and their relevant outcomes for patients undergoing medical/surgical interventions.</li> <li>5- Explain the nutritional needs of patients undergoing selected medical/surgical interventions.</li> <li>6- Discuss the principles of teaching and learning processes in relation to the adult/older patient.</li> <li>7- Utilize health assessment skills in identifying the physical, psychological, spiritual, and educational needs of adult patients.</li> <li>8- Apply theoretical concepts and scientific principles in planning patient care.</li> <li>9- Demonstrate competence in implementing nursing interventions to achieve patient-oriented goals.</li> <li>10- Demonstrate safe administration of medications and parenteral therapy.</li> <li>11- Participate in patient education.</li> <li>12- Demonstrate effective communication with patients, educators, and health care professionals.</li> <li>13- Describe preoperative nursing measures to avoid the risk of infection and expected complications after surgery.</li> </ol>				
<b>9. Teaching and learning strategies</b>	<ul style="list-style-type: none"> <li>- Theoretical lectures.</li> <li>- Discussions.</li> <li>- Seminars, reports and scenarios.</li> <li>- Clinical training.</li> </ul>				

#### 10. Course Structure

Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars. - Clinical training.	Introduction to adult nursing specialist	Learn about the philosophy and objectives of adult nursing specialty.	4T + 12 C	1
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars. - Clinical training.	Part 1: Nursing management of patients with nervous system disorder( Assessment and diagnostic test , Intracranial pressure)	Learn about the basic concepts of nervous system disorder and how to care for and educate patients.	4T + 12 C	2
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars. - Clinical training.	Part 2: Nursing management of patients with nervous system disorder (brain tumors, head injury)	Learn about the basic concepts of brain tumor and head injury and how to care for and educate patients.	4T + 12 C	3
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Nursing management of patients with Renal disorders	Learn about the basic concepts of Renal disorders and how to care for and educate patients.	4T + 12 C	4
<b>Mid-term exam. No 1</b>					5
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 1: Nursing management of patients with Musculoskeletal disorders (Assessment and diagnostic test, Fracture)	Understand the basic concepts of Musculoskeletal disorders and how to care for and educate patients.	4T + 12 C	6
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical Training.	Part 2: Nursing management of patients with Musculoskeletal disorders(Osteomyelitis , Arthritis)	Understand the basic concepts of Osteomyelitis and Arthritis and how to care for and educate patients.	4T + 12 C	7

Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 1: Nursing management of patients with Cardiovascular disorders) Assessment and signs and symptoms and diagnostic test)	Understand the basic concepts of Cardiovascular disorders and how to care for and educate patients	4T + 12 C	8
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 2: Nursing management of patients with Cardiovascular disorders( valvular disorder )	Understand the basic concepts of ( valvular disorder and how to care for and educate patients.	4T + 12 C	9
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Mid-term exam. No 2	Nursing management of patients with Integumentary disorders.	Understand the basic concepts of Integumentary disorders and how to care for and educate patients.	10
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 1: Nursing management of patients with Eye, Nose and Throat (ENT)	Understand the basic concepts of patients with Eye, Nose and Throat disorders and how to care for and educate patients.	4T + 12 C	11
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 2: Nursing management of patients with Eye, Nose and Throat (ENT). (Otitis media)	Understand the basic concepts of patients with Eye, Nose and media and how to care for and educate patients.	4T + 12 C	12
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 1: Nursing management of patients with ophthalmic disorders.	Understand the basic concepts of cardio- Otitis media and how to care for and educate patients.	4T + 12 C	13
Daily exams, Questions within the lecture, & Practical evaluation.	- Lectures. - Scenarios and seminars - Clinical training.	Part 2: Nursing management of patients with ophthalmic disorders. (cataract)	Learn the basic concepts of cataract and how to care for and educate patients.	4T + 12 C	15

Assist. Prof. Dr. Hussein A. Al-Ghanimi	hughanimi@alameed.edu.iq					
<b>8. Course Objectives</b>	<p>This course is designed to provide the nursing students with a comprehensive knowledge of the basic concepts and principles in pathophysiology including cell injury, etiology of cell injury, stress-adaptation and coping, inflammation and immunity, neoplasia, lymphoproliferative disorders, infectious processes. The course also focuses on physiological alterations associated with various pathological conditions such as alterations in oxygen transport, homeostasis-blood flow-blood pressure and cardiac function, heart failure, and alteration in respiratory function.</p> <p>At the end of the course the student will be able to:</p> <ol style="list-style-type: none"> <li>Understand concepts related to pathophysiology (complex nature of disease).</li> <li>Recognize types of stressors, injuries and infectious agent.</li> <li>Understand the mechanism of disease (mechanism of body response) which includes: Stress, Inflammation and Neoplasia.</li> <li>Identify disorders related to major human body functions.</li> </ol>					
<b>9. Teaching and learning strategies</b>	<ul style="list-style-type: none"> <li>- Theoretical lectures.</li> <li>- Discussions.</li> </ul>					

#### 10. Course Structure

Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	Introduction and Definitions	Learn about the etiology classification, pathogenesis, clinical manifestation, and implication for treatment.	2 T 1	
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	Cell injury and etiology of cellular injury	Learn about reversible cell injury, adaptation, and irreversible cell injury. Understand hypoxic, nutritional, infectious, chemical, physical, and cellular injuries.	2 T 2	
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	Stress, adaptation and coping	Learn about the Definitions, General adaptation syndrome, Local adaptation syndrome, and Coping.	2 T 3	
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	Inflammation and immunity	Learn about the definitions, components of immune system, non-specific immunity of immune system, inflammatory process, inflammatory responses, specific immunity, change in the immune system during aging, and disorder of immune system.	2 T 4	
Mid-term exam. No 1				5	
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	Neoplasia	Understand the basic definitions, principles of cancer biology, cancer host interaction, cancer therapy, and cancer risk factors.	2 T 6	

Daily exams, Questions within the lecture.	- Lectures. - Discussion.	<b>Lymphoproliferative disorders</b>	Understand the pathophysiology of leukemia, Hodgkin's disease, non-Hodgkin's disease, and multiple myeloma	2 T	7
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	<b>Infectious processes</b>	Understand the types of microorganisms, host-parasite relationship, manifestation of infection, and host factors that decrease resistant of infection.	2 T	8
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	<b>Alteration in oxygen transport, homeostasis, and blood coagulation</b>	Understand the gas transport, acid-base balance, anemia, polycythemia, process of homeostasis, evaluation of homeostasis & coagulation, and disorders of homeostasis.	2 T	9
<b>Mid-term exam. No 2</b>				10	
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	<b>Alteration of blood flow and blood pressure</b>	Learn about the general mechanisms, control of flow. Understand the alternations in arterial, venous, and lymphatic flow. Understand the functions of arterial and pulmonary systems, measurement of arterial blood pressure, hypertension, and orthostatic hypotension.	2 T	11
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	<b>Alteration in cardiac function</b>	Understand the coronary circulation, cardiac electrophysiology, electrocardiograph, endocrine function of the heart, test of cardiac function, ischemic heart disease, and myocardial disease.	2 T	12
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	<b>Heart failure and dysrhythmias</b>	Understand the heart failure and cardiac dysrhythmias	2 T	13

Daily exams, Questions within the lecture.	- Lectures. - Discussion.	Alteration in respiratory function	Learn about the obstructive pulmonary disorders, restrictive pulmonary disorders, ventilation & respiratory failure, and other respiratory disorders.	2 T	14		
Daily exams, Questions within the lecture.	- Lectures. - Discussion.	Alteration in gastrointestinal function	Learn about the Manifestations of gastrointestinal disorders, alteration in integrity of the gastrointestinal tract wall, alteration in motility of the gastrointestinal tract, other gastrointestinal disorders.	2 T	15

#### 10. Course Structure

Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Introduction and Overview to Medical Parasitology	Learn about parasitology and its classifications, mentioning the type of each species.	2T	1
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Protozoa, Entamoeba Histolytica, Extraintestinal Amoebiasis, Entamoeba Coli	Identify protozoa that exist as parasites. Identify types of amoebiasis, the diseases they cause, their diagnosis and treatment.	2T	2
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Intestinal Flagellates	Learn the basic concepts of flagellates that infect the intestine, their types, the diseases they cause, and methods of diagnosing and treating them.	2T	3
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Luminal and Atrial flagellates	Learn the basic concepts Luminal and Atrial flagellates, the diseases they cause, and methods of diagnosing and treating them.	2T	4
Mid-term exam. No 1		Tissue flagellate, Leishmania Donovanii Leishmania Tropica	Understand the basic concepts, flagellate, Leishmania Donovanii, Leishmania Tropica the diseases they cause, and methods of diagnosing and treating them.	2T	5
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.				6

Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Trypanosomes	Learn about the types of trypanosomes, the diseases they cause, and how to treat and diagnose them.	2T	7
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Malaria	Learn about the types of Malaria, the diseases they cause, and how to treat and diagnose them.	2T	8
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Toxoplasma Gondii	Learn about Toxoplasma Gondii, the diseases it causes, and how to treat and diagnose them.	2T	9
<b>Mid-term exam. No 2</b>					
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Helminthes (metazoan) general structure	Identify the types of Helminthes (metazoan) general structure, the diseases they cause, and methods of treating and diagnosing them.	2T	11
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Blood Flukes Schistosomes	Learn about the types of Blood Flukes, Schistosomes, the diseases they cause, and how to treat and diagnose them.	2T	12
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.				
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Enterobius vermicularis, Trichuris trichiura & Ancylostomaduodenale	Identify the types of Enterobius vermicularis, Trichuris trichiura & Ancylostomaduodenale, the diseases they cause, and methods of treatment and diagnosis.	2T	13
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Virology Part 1	Learn the basic concepts of virology, methods of treatment, transmission and spread among members of	2T	14

		society, and the methods of classification that are used to classify them.		
Daily exams, Questions within the lecture, & Practical evaluation.	Theoretical lectures. Scenarios and videos. Laboratory training.	Virology Part 2	Identify the most important types of pathogenic viruses	2T 15

<b>8. Course Objectives</b>	<ol style="list-style-type: none"> <li>1. Familiarize with the User Interface: Learn how to navigate the Excel interface, including menus and the main ribbon.</li> <li>2. Create and Format Spreadsheets: Gain the ability to enter data into cells, organize it into tables, and format it using various styles.</li> <li>3. Perform Basic Calculations: Learn how to use basic arithmetic formulas such as addition, subtraction, multiplication, and division.</li> <li>4. Use Functions: Learn how to use built-in functions like SUM, AVERAGE, and IF for quick and efficient data analysis.</li> <li>5. Organize and Analyze Data: Acquire the ability to sort and filter data to facilitate analysis and draw specific conclusions.</li> <li>6. Create Charts: Learn how to convert data into various charts, such as bar, line, and pie charts, to visually represent outcomes.</li> <li>7. Use Pivot Tables: Learn how to create pivot tables to analyze large datasets with flexibility and efficiency.</li> <li>8. Manage Large Data Sets: Learn how to handle large amounts of data using advanced filtering and conditional formatting features.</li> <li>9. Collaboration and Sharing: Learn how to share spreadsheets and work on them collaboratively or online.</li> <li>10. Prepare Documents for Printing: Learn how to prepare spreadsheets for printing, including adjusting layout and paper size.</li> </ol>					
<b>9. Teaching and learning strategies</b>	<ul style="list-style-type: none"> <li>- Discussions.</li> <li>- Lab</li> </ul>					

## 10. Course Structure

Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams & Practical evaluation.	Practical training.	Introduction to Excel	<ul style="list-style-type: none"><li>Familiarize with the user interface (columns, rows, cells)</li><li>Open and create a new workbook</li><li>Enter data into cells (text, numbers)</li><li>Save the workbook and basic cell formatting</li></ul>	2 L 1	1
Daily exams & Practical evaluation.	Practical training.	Formatting Cells and Data	<ul style="list-style-type: none"><li>Format fonts, colors, and borders within cells</li><li>Adjust column and row sizes</li><li>Apply number formats like currency, percentages, and dates</li><li>Customize worksheets (add, delete, rename sheets)</li></ul>	2 L 2	2
Daily exams & Practical evaluation.	Practical training.	Basic Math Formulas	<ul style="list-style-type: none"><li>Write basic mathematical formulas (addition, subtraction, multiplication, division)</li><li>Use relative and absolute cell references</li><li>Apply formulas to data sets</li></ul>	2 L 3	3
Daily exams & Practical evaluation.	Practical training.	Using Built-in Functions	<ul style="list-style-type: none"><li>Learn common functions like (SUM, AVERAGE, MAX, MIN)</li><li>Use functions to analyze data</li></ul>	2 L 4	4

			<ul style="list-style-type: none"> <li>Apply conditional functions such as (IF, COUNTIF)</li> </ul>

8. اهداف المقرر	
1. أن ينشأ الطالب على حب العربية لغة القرآن الكريم.	
2. التعرّف على مواطن الجمال في اللغة العربية وأدابها.	
3. تعريف الطالب بألفاظ اللغة العربية الصحيحة وتراتيبها وأساليبها السليمة بطريقة مشوقة وجذابة.	
4. تعميق الطالب من استعمال اللغة صحيحاً في الاتصال القراءة الصحيحة، وأن يكتسب القدرة على صياغة العبارات لغوية.	
5. تنمية حس الاستماع لما يسمع؛ كالسرعة وجودة الإلقاء.	
6. تنمية الذوق الأدبي لدى الطالب حتى يدرك النواحي الجمالية في أساليب الكلام ومعانيه وصوره.	
7. استعمال أفكاره وما يقع تحت حواسه نطقاً وكتابة وحسن توعيده التعبيرات السليمة الواضحة.	
8. تنمية قدرة النواحي جميعها، ومهارة الطالب بحيث يستطيع الكتابة الصحيحة.	
9. إيقاظ وعي الطالب إدراك حرف الكلمة وتوجيهها؛ للمحافظة على طهارتها ونقاوها.	
10. العمل على النهوذ باللغة العربية والعمل على نشر ما قدر المستطاع.	
11. تعليم الطالب قواعد الحديث واحترام الرأي الآخر وكذلك التغلب على عامل العجلة.	
9. استراتيجيات التعليم والتعلم	
- المحاضرات النظرية.	
- المناقشات.

8. Course Objectives	<ol style="list-style-type: none"> <li>1. describe the types of research</li> <li>2. define some key terms in research.</li> <li>3. To identify choose of research design by student.</li> <li>4. To know the sample and sampling and how benefit for researcher for under graduate.</li> </ol>					
9. Teaching and learning strategies	<ul style="list-style-type: none"> <li>- Theoretical lectures.</li> <li>- Discussions.</li> </ul>					

#### 10. Course Structure

Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Concept of Nursing Scientific Research -Characteristics of Nursing Research Research O-objectives of Nursing Research	Learn the basic concept and terms for nursing research that increase among the student also to identify his objectives.	2 hrs. T	1
Daily exams, Questions within the lecture	Lectures. seminars.	Nursing and Scientific Research. -Importance of Scientific Research in Nursing -New Trend Issues for Nursing Research - Preliminary Steps in Research Process	Learn about basic concept in scientific research and what is steps in research method in nursing.	2 hrs. T	2
Daily exams, Questions within the lecture,	Lectures. seminars.	Concept of Nursing Research Problem -Identifying nursing research problem - Importance of Scientific Research problem	Learn the basic concept about research problem of disease and identify how type and criteria for research problems.	2 hrs. T	3
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Scientific Research variables (Dependent and independent variables) -Pilot study, Reliability and Validity	Learn the types of variable and how distinguish between reliability and validity and why are important in scientific research.	2 hrs. T	4
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Mid-term exam. No 1 Scientific resources (uses, methods, write it)	Learn about the types references and the	2 hrs. T	5
					6

			method of writing in of reference and article.		
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Hypothesis in Scientific Research (concept, goal, type)	Identify the hypothesis and his important and types in scientific research and the agree between statistical and hypothesis	2 hrs. T	7
Daily exams, Questions within the lecture.,	- Lectures. - seminars.	Approaches of Scientific Research (Design, experimental and non-experimental): importance, functions, process	Learn about the concept basic about research design and their important in research method in nursing	2 hrs. T	8
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Sample and Sampling	Learn about the role of sample and sapling to easy data collection and their important in research paper	2 hrs. T	9
<b>Mid-term exam. No 2</b>					
Daily exams, Questions within the lecture,	- Lectures. - seminars.	How to write the objectives and definition terms	This lecture learn to the students how write the objective through use smart objectives.	2 hrs. T	11
Daily exams, Questions within the lecture,	- Lectures. - seminars.	methodology and Materials of Scientific Research paper	Learn the basic concept about research problem of disease and identify how type and criteria for research problems.	2 hrs. T	12
Daily exams, Questions within the lecture,	- Lectures. - seminars.	writing of Scientific Research (title, research contents) Deficit of Scientific Research	Identify The basic concept and write the title and research content.	2 hrs. T	13

## 12. Learning Resources

Rose Marie Nieswiadomy, Foundations of Nursing Research,six edition, by Pearson Education,2012

<b>1. Course Name</b>	Sociology in Nursing					
<b>2. Course Code</b>	<b>HOS303</b>					
<b>3. Semester/Year</b>	third Stage/First Semester					
<b>4. Date of Preparation of this Description</b>	18/ 9/ 2024					
<b>5. Available Attendance Forms</b>	Personal Education (In-Person)					
<b>6. Total Number of Hours and Units</b>	2 Theoretical (2 Hours Per Week), Number of Credits (2)					
<b>7. Name of Course Supervisor</b>	<table border="1"> <tr> <td>Name</td> <td>E-Mail</td> </tr> <tr> <td>Lecturer assist: Ali falah hassen</td> <td>Ali <a href="mailto:falah@alameed.edu.iq">falah@alameed.edu.iq</a></td> </tr> </table>		Name	E-Mail	Lecturer assist: Ali falah hassen	Ali <a href="mailto:falah@alameed.edu.iq">falah@alameed.edu.iq</a>
Name	E-Mail					
Lecturer assist: Ali falah hassen	Ali <a href="mailto:falah@alameed.edu.iq">falah@alameed.edu.iq</a>					
<b>8. Course Objectives</b>	<ol style="list-style-type: none"> <li>Understand certain concepts of sociology.</li> <li>Identify the components of a society.</li> <li>Determine the importance of sociology on the nursing profession.</li> <li>Recognize the interpersonal relationships among the health team and between the nurse and clients.</li> <li>Determine the rights and roles of clients, nurses, and other health team.</li> <li>Develop positive attitude towards clients, nurses and other members of the health team.</li> <li>Explore the reflection of health and diseases issues on the social behaviors of individuals, groups and societies.</li> <li>Determine the role of the community in the preventive and curative aspects of health services.</li> <li>Analyze critically common health problems of the Iraqi society.</li> <li>Suggest solutions to the health problems of the society depending on scientific base</li> </ol>					
<b>9. Teaching and learning strategies</b>	<ul style="list-style-type: none"> <li>- Theoretical lectures.</li> <li>- Discussions.</li> </ul>					

10. Course Structure					
Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	Sociology introduction	Learn about sociology, sociologists, common problems in society, their spread, and how to deal with them and control them.	2t 1	
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	Poor & diseases	Identify the effects of health and how wars and conflicts affect them.	2t 2	
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	Social issues	Identify common and major social issues and how to prevent and control them.	2t 3	
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	Sociology perspective & theories	Learn about sociological theories and how social conflicts occur, and learn about Marxian theory and feminist theory.	2t 4	
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	The family	Identifying the concept of the general meaning of family, its types and aspects in educating a family.	2t 5	
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	Gender, Sex, and Sexuality	Identify the concept difference between gender and race, what are sexual orientations, and the role of each within society.	2t 6	
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	Aging and the Elderly	Learn about the concept of gerontology, what are the stages of aging, and	2t 7	

			the factors that affect the health of the elderly.	
		Mid-term exam. No 1		8
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	Religion	Learning about religions and the role of sociology in learning about them and the world's religions.	2t 9
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	education	Definition of education in sociology and the role of sociology in changing society.	2t 10
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	Population, Urbanization, and the Environment	Identify the meaning of demographic data and the general meaning of the concept of population, rural and urban life, and factors affecting health.	2t 11
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	Race and ethnicity	Identify the meaning and concept of race, nationalism, class in society, discrimination and prejudice and their negative impact on the individual's social life.	2t 12
Daily exams, Questions within the lecture,	- Lectures. - Discussion.	Impulsivity	Identifying the concept of impulsivity, the factors that motivate it, its impact on the rest of the behavior of individuals, and what are the plans that prevent and control it.	2t 13
			Mid-term exam. No 2	14

Daily exams, Questions within the lecture,	- Lectures. Discussion.	Bulling	Identifying the concept of bullying, its types, its chain of occurrence in society, and how to treat and control it.	2t	15
Daily exams, Questions within the lecture,	- Lectures. Discussion.	Grief	Identifying the meaning of grief, what its stages are, how it affects an individual's life within society, and how to mitigate its occurrence.	2t

10. Course Structure						
Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week	
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Overview of nutrition, Assessment of nutritional Status	Learn about nutrition, nutrients and the factors that affect them	2 hrs. T	1	
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Dietary references and diet- planning Guides	Learn about the food pyramid and sources of nutrients	2 hrs. T	2	
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Metabolism of nutrients and energy balance	Learn how the body shares nutrients and stores energy from them	2 hrs. T	3	
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Carbohydrate (Sugar, starch, and Fiber)	Learn about the types of carbohydrates and their functions and how the body helps them	2 hrs. T	4	
		Mid-term exam. No 1		5		
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Lipids, Fats, Oil, Phospholipids, and Sterols.	Learn about the types of Fat and their functions and how the body helps them	2 hrs. T	6	
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Protein and Amino Acids	Learn about the types of protein and their functions and how the body helps them	2 hrs. T	7	
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Vitamins	Learn about the types of vitamins their functions, and how the body deals with them	2 hrs. T	8	
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Water and Minerals	Learn about the role of water and minerals in the body and the body's daily needs for them	2 hrs. T	9	
		Mid-term exam. No 2		10		

Daily exams, Questions within the lecture,	- Lectures. - seminars.	Nutrition during pregnancy and lactation	Identify nutritional needs during pregnancy and lactation	2 hrs. T	11
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Infant nutrition	Identify the types of feeding, and nutrition during the weaning stage	2 hrs. T	12
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Nutrition during Aging	Identify the nutritional categories required during Aging	2 hrs. T	13
Daily exams, Questions within the lecture,	- Lectures. - seminars.	The Concept of Western diseases	Identify the dietary pattern that must be used in Western diseases	2 hrs. T	14
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Malnutrition	Identify malnutrition and ways to prevent it	2 hrs. T	15

#### 10. Course Structure

Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Concepts, Principles and definition of health and health promotion	Learn about the concepts of health and principles of health promotion	2 hrs. T	1
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Approaches to health promotion and disease Prevention	Learn about health promotion approaches in disease prevention	2 hrs. T	2
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Areas of health promotion activities	Learn how to develop effective strategies in each area to promote healthy awareness and behavior	2 hrs. T	3
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Health education	Learn about the concepts of health education and the role of the health educator.	2 hrs. T	4
Mid-term exam. No 1				5	
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Communication skills and active communication	Learn communication skills and effective communication method	2 hrs. T	6
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Measurement of health and health promotion	Learn how to evaluate the effectiveness of health promotion programs using specific measurement tools.	2 hrs. T	7
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Models of Health and Illness	Learn about different models of health and disease, including	2 hrs. T	8

			biological, social, and psychological models.	
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Health Promotion Model	Learn about a comprehensive understanding of the health promotion model and its basic components	2 hrs. T 9
		Mid-term exam. No 2		10
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Trans theoretical model	Learn about healthy behavior and explain the stages of changing healthy behavior.	2 hrs. T 11
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Nursing Process in health promotion and nursing management	Learn about ways necessary to enhance students' understanding of the essential elements of the nursing process and how they apply to health promotion.	2 hrs. T 12
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Risk factors	Learn how to prevent disease risk factors	2 hrs. T 13
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Health promotion guideline a cross life span	Learn about health activities across human age groups	2 hrs. T 14
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Occupational cancer	Learn about types of occupational cancers and ways to educate and raise awareness to prevent them	2 hrs. T 15

<b>8. Course Objectives</b>	<ol style="list-style-type: none"> <li>1. present the history of epidemiology</li> <li>2. Define the different meanings of epidemiology</li> <li>3. Understand the causal inferences and advocacy</li> <li>4. Apply the measures of epidemiology</li> <li>5. Understand the disease process, the epidemiological model, infection and life expectancy</li> <li>6. Understand the control of communicable diseases strategies, and occupational epidemiology</li> <li>7. Realize the definition, types and advantages of incubation period.</li> <li>8. Understand how to apply the epidemiological studies.</li> </ol>					
<b>9. Teaching and learning strategies</b>	<ul style="list-style-type: none"> <li>- Theoretical lectures.</li> <li>- Discussions.</li> <li>- Seminars.</li> <li>-scenario</li> </ul>					

10. Course Structure					
Evaluation Methods	Teaching and Learning Methods	Subject Title	Required Learning Outcomes	Hours	Week
Daily exams, Questions within the lecture,	- Lectures. - seminars.	History of Epidemiology: - Concept of epidemiology. - Etymology. - Veterinary epidemiology. - Botanical epidemiology. - Epidemiology as causal inference. - Epidemiology as advocacy.	Learn the basic concept for epidemiology that increase among the student also to identify the relationship between veterinary and epidemiology.	2 hrs. T 1	
Daily exams, Questions within the lecture	- Lectures. - seminars.	Health Measures and statistics: Measures of Occurrence: - Incidence measures: - Incidence density (rate). Hazard rate. Cumulative incidence. Measures of Association: - Relative measures: - Risk ratio. Rate ratio. Odds ratio. Hazard ratio. Absolute measures: - Risk, rate, incidence differences - Attributable risk: - Attributable risk in exposed. Percent attributable risk.	Learn about basic statistical measurement through health parameters and know how calculate the mortality and morbidity.	2 hrs. T 2	
Daily exams, Questions within the lecture,	- Lectures. - seminars.	The disease process The natural history of disease	Learn the basic concept about natural history of disease and identify the association between disease process and level of prevention.	2 hrs. T 3	

Daily exams, Questions within the lecture,	- Lectures. - seminars.	The epidemiological model: Agent, host, environment Variation	Learn about the elements of epidemiological triangle and what is effect on health and disease.	2 hrs. T	4
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Mid-term exam. No 1  Infection: Modes of transmission.	Learn about the types Modes of transmission and how to transmission of infection and stages of the infection.	2 hrs. T	5
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Life expectancy: The impact of disease	Learn about the types of Life expectancy and continues of health and disease.	2 hrs. T	6
Daily exams, Questions within the lecture,,	- Lectures. - seminars.	Communicable disease control strategies: Procedures for disease control	Learn about the types of strategies and Procedures for disease and infection control	2 hrs. T	7
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Occupational epidemiology	Learn about the role of Occupational epidemiology and determine and know common disease relative to occupation.	2 hrs. T	8
Daily exams, Questions within the lecture,	- Lectures. - seminars.	Mid-term exam. No 2  Incubation period: Definition, types, Advantages	This lecture learn to the initiation and late incubation period and how to identify the incubation period.	2 hrs. T	9
Daily exams, Questions within the lecture,	- Lectures. - seminars.	causality of disease	This lecture lead to the basic concept of causality and etiology and identify the types of causality.	2 hrs. T	10

Daily exams, Questions within the lecture,	- Lectures. - seminars.	Epidemiological studies	Identify The basic concept for the epidemiological study and how this study is benefited for disease prevention.	2 hrs. T	13

Lec. Dr. Ameer Salah Al deen	Ameer. Alfadhel 91@gmail.com	
<b>8. Course Objectives</b>		
1. Discuss the trends, foundations, and concepts of mental health nursing.		
2. Identify the community-based nursing care (mental health promotion and mental illness prevention.)		
3. Describe the ethical and legal issues in nursing.		
4. Identify the mental health nursing theories.		
5. Implement therapeutic communication and interpersonal relationship.		
6. Apply the nursing process in providing the nursing care for the client.		
7. Identify and assist in providing special treatment modalities.		
8. Describe different types of psychiatric disorders.		
9. Recognize client behaviors and problems.		
10. Assess the mental health statuses of client.		
11. Change the student's attitudes toward mental health and mental illness nursing.		
12. Appraise the nurse's role in the community mental health nursing.		
<b>9. Teaching and learning strategies</b>		
- Theoretical lectures.		
- Discussions.		
- Seminars, reports and scenarios.		
- Clinical training.		

10. Course Structure
