## Publication Conditions

Inasmuch as Al-`Bahir- effulgent-Abualfadhal Al-`Abbas cradles his adherents from all humankind, verily Al-Bahir journal does all the original scientific research under the conditions below:

1. Publishing the original scientific research in the various scientific sciences keeping pace with the scientific research procedures and the global common standards; they should be written either in Arabic or English and have never been published before.
2. Being printed on A4 using Word Program, delivering a copy and CD having, approximately, 10,000 - 15,000 words under simplified Arabic or times new Roman font without using scan for the figures.
3. Delivering the abstracts, Arabic or English, not exceeding a page, 350 words, with the research title.
4. The front page should have the title; the name of the researcher / researchers, occupation, address, telephone number and email, and taking cognizance of averting a mention of the researcher / researchers in the context.
5. Making an allusion to all sources in the endnotes, and taking cognizance of the common scientific procedures in documentation; the title of the book, editor, publisher, publication place, version number, publication year and page number. Such is for the first mention to the meant source, but if being iterated once more, the documentation should be only as; the title of the book and the page number.
6. The references of the paper have to be mentioned by using the numbers according to their mentioning in the paper itself. These references have to be mentioned at the end of the paper.
7. Printing all tables, pictures and portraits on attached papers, and making an allusion to their sources at the bottom of the caption, in time there should be a reference to them in the context.
8. Attaching the curriculum vitae, if the researcher cooperates with the journal for the first time, so it is to manifest whether the actual research submitted to a conference or a symposium for publication or not. There should be an indication to the sponsor of the project, scientific or nonscientific, if any.
9. The research should never have been published previously, or submitted to any means of publication; in part, the researcher is to make a covenant certifying the abovementioned cases.
10. In the journal all the published ideas manifest the viewpoints of the researcher himself / herself it is not necessary to come in line with the issuing vicinity, in time, the research stratification is subject to technical priorities.
11. All research should be exposed to Turnitin processes and a confidential revision to state their reliability for publication. No research retrieved to researchers; whether they are approved or not; it takes the procedures below:

A: A researcher should be notified to deliver the meant research for publication

B: A researcher whose paper approved is to be apprised of the edition chief approval and the eminent date of publication.

C: With the rectifiers reconnoiters some renovations or depth, before publishing, the research has to be retrieved to the researchers to accomplish them for publication.

12: A researcher bestowed a version in which the meant research published, and a financial reward.

13. Taking into consideration some points for the publication priorities, as follows:

A: Research participated in conferences adjudicated by the issuing vicinity.

B: The date of research delivery to the edition chief.

C: The date of the research that has been renovated.

14. The Researcher can deliver her/his research paper to us either via Journal website <http://albahir.alkafeel.net> , she/he/has to fill the standard format , or Al-Ameed Journal building ( Al-Kafeel Cultural Association), behind Al-Hussein (PBUH) Amusement City, Al-Hussein (PBUH) Quarter, Holy Karbala, Iraq

**Edition Word**

To inaugurate tends to be persistence and change to the circumstances compassing one who sets step in such... ultimately it is life or a shepherd to life; from a general vantage point such inauguration is to be thanked, as the Al-Bahir journal surges as paramount and preponderant among the referred journals in the International Al-'Ameed Centre for Research and Studies and manifests the scientific façade, engineering and applied sciences, pertinent to other humanist facades: Al-'Ameed and Tasleem journals.

Such a threshold comes as third in the horizon of the Al-Bahir journal to cull a constellation of various research studies certain researchers of different authenticated Iraqi universities coin and invest such a vent to invite other researchers, engineering and applied sciences researchers, worldwide to contribute their products to the Al-Bahir journal; without them such a scientific and academic threshold wades not into effulgence: by them it palpitates with life, from them it imbibes its success and eviternity.

Last we do thank the earnest researchers whose names embroider the pages of the current edition and we do pray to Him, the most Glorified, to confer success and sapience upon their practical and scientific life.

Nothing we do supplicate but thank, the Almighty, and peace be upon our master Mohammed and his benevolent and immaculate posterity.
