FOR THE UNIVERSITY OF AL-AMEED
2022-2023

Sustainability Report of University of Al-Ameed

University of Al-Ameed:

keeps pace with the 17 sustainable development goals and standards and works to implement them at an increasing pace. It also presents its readiness for local, national, regional and international cooperation. It also monitors and researches international developments in the field of environment and sustainability. It also responds positively to international standards and requirements by adopting a flexible policy and amending it accordingly. Therefore, out of a sense of social and ethical responsibility towards the environmental impacts that may result from its activities and activities, despite adopting the least harmful in all its activities, in order to ensure a safe and sound environment for the community.

The university's policy in the field of environment and sustainability was based on continuous improvement and measuring the gap and comparison between the university performance evaluation of previous years. The university has been developing its infrastructure in a way that suits its students and members, It has equipped the classrooms and laboratories with the latest equipment and in compliance with international standards, The university took into account the absorptive capacity. For all its formations, to ensure that there is no burden on students and teachers, and to ensure that information is conveyed correctly, The university also took into consideration occupational safety and health in its laboratories, and to ensure the security and safety of students and workers in the laboratories, as it equipped them with the latest supplies of fire extinguishers, Hoods equipped with sterilization systems, sterile materials, protection supplies, and isolation of preparation rooms from the laboratory, Eye washbasins, smoke and fire detection systems, emergency exits, special gas piping systems, committees for destroying chemical and biological materials, cooperative agreements in this field, preparing advance work plans for experiments so that the student is not affected, As a result, providing material and moral support for these programs, increasing the number of training workshops for staff, hosting specialized training bodies, providing an emergency plan, evacuation programs, and much more... The university also improved sustainability programs and infrastructure by increasing green spaces, In addition to adopting wide and clean walkways and private sessions for students in a sophisticated manner based on very high standards, it also used the waste separation method by importing specialized containers, and the use of sustainable lighting through the use of economical lamps at a very high rate to reduce the rate of electrical energy consumption, It also used The same method of rationing the consumption of the water resource through self-cutting faucets. It also launched many initiatives to rationalize the consumption of water resources. The university encouraged

afforestation campaigns, whether inside or outside the university, through the campaigns it carries out in partnership with its students and employees.

The university also contributed to achieving quality programs and academic performance by increasing the support provided to these programs, and supporting institutional, programmatic, and laboratory accreditation programs for all its colleges, To achieve the goal of good education, the university increased the percentage of funding for scientific research, in addition to holding many educational and scientific conferences and seminars in many countries, Among the various fields that would raise the university's scientific value at all levels, the university also established a scientific magazine affiliated with one of the Scopus libraries, issued many publications and books that help the scientific method, and provided support to the central library by raising the percentage of financial allocation to it for the purpose of bringing modern sources. Modernization, achieving scientific agreements in this field, and launching many educational platforms and other supporting services, such as the plagiarism detection service and the virtual library.

The university took into account the good health conditions inside the classrooms and laboratories in terms of ventilation, lighting, and a comfortable atmosphere, as well as the use of many environmentally friendly materials, In the field of laboratories, the university adopted programs to limit and reduce waste and loss by requesting chemicals at a lower rate than required. To ensure that these materials do not get damaged, it also concluded a cooperation agreement with Al-Kafeel Hospital to dispose of materials that deserve to be destroyed using the correct sanitary methods. As for achieving the rest of the sustainable development goals, the university launched many free scholarships for its students, especially those with a low financial level, taking into account their personal and humanitarian circumstances. As it became the first supporter for them in their academic journey, the university contributed strongly to supporting programs to reduce poverty rates among students through scholarships provided throughout the period of study, as well as partial scholarships, material and moral support for students by providing financial aid and nutrition programs provided to them in the student club. Free recreational trips, involving them in community activities, providing guidance and educational consultations to solve their psychological and social problems, providing job opportunities for them by selecting distinguished people to be appointed to Al-Kafeel Specialized Hospital, providing free transportation for them, and providing them with decent housing in the internal departments at very nominal prices. It was approved. The university also implements the accompanying person program, which accompanies students with special needs and helps them complete their academic program, taking into account the rest of their needs, which include their health care, their tuition discounts, in which the university took into account their economic circumstances, and as one of the poverty eradication programs among the goals of sustainable development. , The university also took into account their participation in all established university programs, as well as their representation in academic forums and activities held by the university, such as conferences, seminars, workshops, and visits. The university took into account, in implementation of the sixteenth goal of the Sustainable Development Goals, which includes achieving peace and justice in its programs by adopting a strategy to combat extremism and terrorism through... It used moderate discourse and urged students and members to have good morals, adhere to the true Islamic religion, and avoid hateful speech. The purpose of this was to raise a generation that developed morally and behaviorally. The university also adopted the

method of a productive, non-profit university by providing community services. Which is appropriate for the university's location at all levels. The university has also achieved many successful agreements that would raise its scientific value, such as the University of Baghdad, the University of Kufa, the University of Nineveh, the University of Karbala, the Karbala Health Department, Al-Kafeel University, Al-Kafeel Hospital, Abu Mahdi Al-Muhandis Hospital, A number of Malaysian universities and other effective agreements are currently on their way to achieving new agreements. As for scientific research, the university has contributed by providing 116 applied research to the national community, which has been announced on the applied research platform, and out of 355 research papers and four patents, the university has contributed to implementing the goal of quality education. Which is considered one of the main goals of the university For the university that undertakes it, the university's journey continues to achieve the rest of the sustainable development goals for the purpose of providing what is best for society.
